

QA Formatting: OK - should probably not be a draft. Should really have a brief section (1 page?) giving general approach to testing, any general test setup etc.,

English: Mostly OK, couple of typos e.g. form -> from,

Test format: Test refs missing from many entries, every test should have a unique identifier.,

Complete and correct?: What about trying to add same friend twice? Test 8 seems to be testing two things at once (accept and decline) should split into two tests. This applies to some other tests too. Friends shouldn't be added until accepted (looks like you have it on request).
