Author: Phil Wilkinson

Produced: 06/11/12, 20:00

Version: 1.0

Matters arising:

- Each person is expected to spend a rough total of 80-120 hours on this project.

First deliverable feedback:

- The copyright date on the front page should be changed from “2008” to “2012”
- New user should get at least one monster and starting money
- For references, put QA.05, project plan document ref, and software used to create the gantt chart.
- Buy/lend should instead be buy/breed

New business:

Test specification design:

- Next deliverable is the test specification, and should be handed in for Friday 16/11/12.
- Chris should do the introduction for the test specification.
- Kamarus and Szymon think up test tasks (at least one test for every function)

- Coders should get together to design some classes sometime this week
- The system test table design should be followed.

Miscellaneous

- At the end of the week, get the database working
- There could be a standards meeting next week (?)
