Monster Mash - Team Awesomer-er

Purpose of meeting: to get feedback upon first draft of deliverables by the deadline, from Bernie

People present:
- Benard Tiddeman
- Josh Bird
- Phil Wilkinson
- Christian Morgan
- Dave Haenze
- Lewis Waldron
- Szymłon Stec
- Thomas Hull

Date: 29/10/12, 11:00-12:00, Llandium Building C55

Circulation list:
- Benard Tiddeman
- Josh Bird
- Phil Wilkinson
- Christian Morgan
- Dave Haenze
- Lewis Waldron
- Szymłon Stec
- Thomas Hull
- Kamarus Alimin

Author: Phil Wilkinson
Produced: 29/10/12, 20:45
Version: 1.0

Matters arising:

1. Gantt Chart
Has been mostly completed.   A few start dates need changing, such as 'acceptance testing' and 'handover of documents'.   'Handover of documents' can be renamed too.

2. GUI
- Perhaps GUI can correspond to the use-case diagram created by Josh
- Perhaps create wireframe of the GUI to show structure and placement of text/images/buttons/input-fields
- Need a section for pending fight requests (and maybe other notifications)

- Perhaps put description regarding what each button does, underneath the button or GUI sketch

3. Risk Assessment
- Do not write everything in capital letters
- Mention review-meeting to re-allocate work if some people get given too much work to be able to reasonably complete in the time-frame
- No 'hand-of-god' mentioned
- More detail needed for each of the risks
- Fix spelling mistakes
- Think of more technical points to bring up.   May want a fall-back plan as we may find some type of techonology to time-comsuming or difficult to implement (e.g. getting stuck on developing AJAX)

4. Overview
- Fix spelling mistakes
- Mention alternatives that we did not use (e.g. Google Apps, Java DB vs. MySQL)
- Mention main serverlet, if we are implementing multiple servers, and what these do
- Mention database table and wiat is going in each table

New business:
- Have the second draft completed by Thursday.
- Next meeting is on Thursday 1st November 2012
- Everybody should work on their corresponding area
- Phil should work on the introduction, purpose of this document, scope, and objectives
